Paper screens

Twenty kinds of screen, drawn in pale grey on a 4-column grid, with blank phones and a blank desktop window at the end. Most journeys need four to six of them. They come from *There Are Only Seventeen Screens* (M01–M17) and the module's own cases (J1–J3).

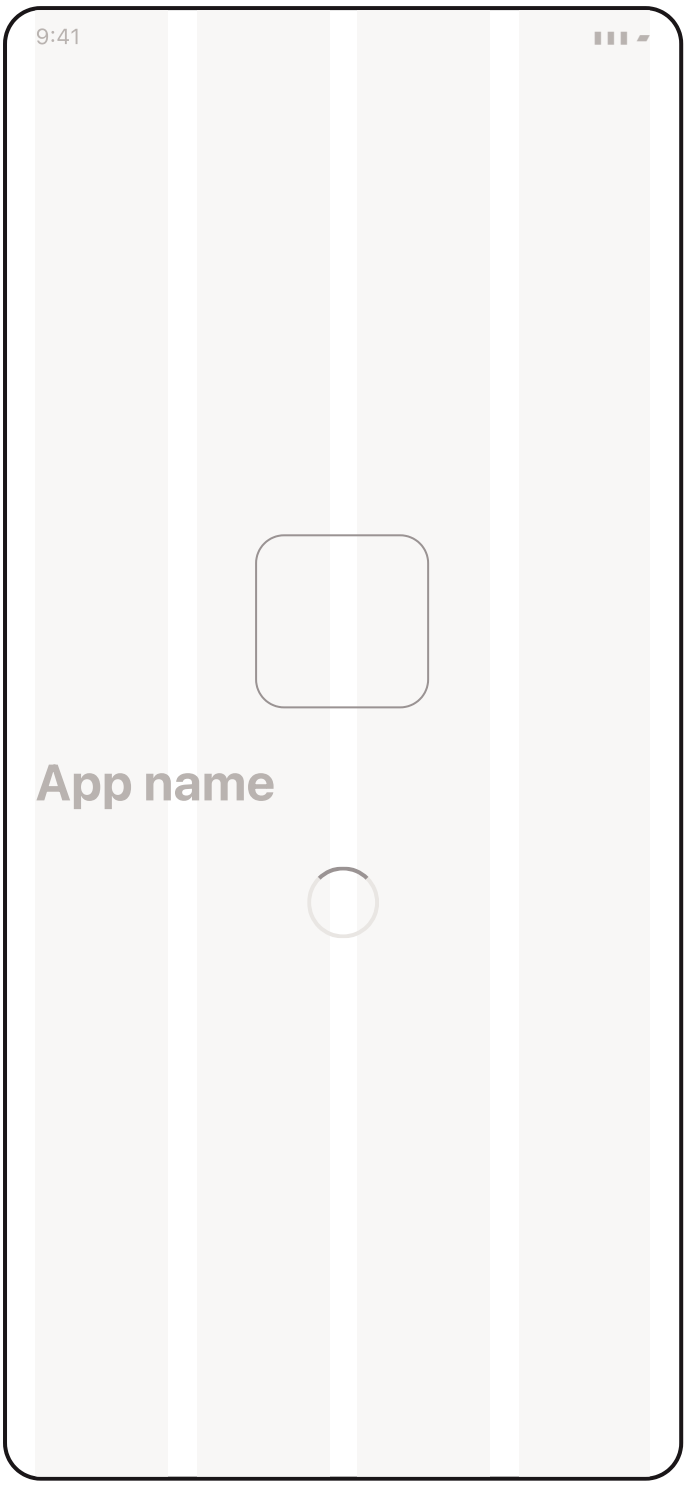

1. **Print at 100%** ("actual size") on A4. The line at the bottom of each page should measure 5 cm.
2. **Pick the screens your journey needs.** Write your own words over the grey, cross out what you do not need, add what is missing.
3. **Cut out components** from the components sheets: they are drawn to the same size, so they fit these screens.
4. **Lay them out in order** on a table. Number each screen and write where it goes next: that is your flow (B4).
5. **Photograph them** into your deck: rough ones in B1, a full set in B5.
