Twenty screens, and what they are made of

Most journeys are four to six of these. Each is shown with the organisms it is usually built from, top to bottom. It is a starting point: swap, add or drop organisms until the screen does its one job for your user.

Where each organism turns up

The same organism does different jobs on different screens: a list is the whole of a Search, and one part of a Home Tab. Nothing fits? Use a blank piece, OWN-01 to OWN-06, one for each height in rows, and name it.
