Paper organisms

Each organism does one job on a screen: a question with its answers, a search box with its filters, a card, a summary. Every one is the full width of the screen and a whole number of rows tall, so any of them fits under any other.

1. **Print at 100%** (“actual size”) on A4. The line at the bottom of each page should measure 5 cm.
2. **Cut along the dashed line.** Every piece is 9 cm wide; its height is 1 to 6 rows.
3. **Stick them onto a screen canvas**, top to bottom. A screen is full at 14 rows: fewer is fine, more will not fit.
4. **Write your own words** over the grey: the heading, the labels, the button.
5. Need two of something? Print that page twice.

Your screen

Stick organisms in, top to bottom. Every organism fills whole rows, so they meet edge to edge.

Screen _____ Kind of screen _____

Job of this screen _____

Goes to _____

SCREEN CANVAS · 14 ROWS
